

Finding/Setting Epic Home Workspace (Dashboard)

1. Upon logging into Epic, click the small tab below the Epic button with the picture of the three-bar graph

(if it's not already selected). This will bring you to your default dashboard.

2. To open a different dashboard, click the downward facing arrow next to your default dashboard's title and select "Show Catalog" from the pop-up that appears.

3. In the catalog, select "Dashboards" from the left-hand navigation pane, then select the dashboard you wish to open. (Note: if you intend to utilize this dashboard frequently, you can "star" it by hovering your cursor over the top right corner of the entry, then click the star icon. Once starred, you can select this dashboard from the pop-up in the previous image without entering the catalog.)
